BCT Members

Please find attached a tech memo outlining details of the upcoming Fall 2016 basewide annual groundwater monitoring event at former George AFB. Note the format of Table 1 has been updated per discussions during the Master Well Presentation held on March 29 and 30, 2016 (red text indicates updated fields). I've also included the excel version should anyone have issues with font size in the PDF. Additionally, you can find the Tech Memo and excel table posted to the portal at the link below:

<https://xnet.cbifederaleservices.com/sites/AFCEEWERC/RegulatorsShaw>

Field work is scheduled to commence on September 26th, 2016, and is estimated to last approximately 3-4 weeks. The proposed well list has remained relatively unchanged from Fall of last year; however, should you have any comments, we request they be submitted to us no later than September 21st.

As always, please feel free to contact me if you have any questions.

Regards

Chris
